DETAILED ACTION

Pending Claims

The pending claims in the instant application are 22-25. The independent claims are 22, 24 and 25.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 22 and 23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a lotion which is liquid at a temperature of at least 5° C, does not reasonably provide enablement for a lotion. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims. Applicant specifically states throughout the specification that the lotion must be liquid at a temperature of at least 5° C (see Abstract and page 10, 3rd full paragraph of the instant application) in order to eliminate difficulty in application of the lotion.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang et al. (U.S. Patent 2,944,931) in view of Allen (U.S. Patent 4,481,243).

Yang et al. substantially teaches the instant claimed absorbent paper product, a handkerchief, containing a lotion wherein the lotion comprises a quaternary ammonium compound and a waxy ester having at least 24 carbon atoms (see col. 1, lines 15-25, col. 2, lines 19-53 and col. 3, lines 3-25). Yang et al. does not disclose that the composition comprises a saturated linear fatty alcohol having at least 16 carbon atoms.

Allen teaches a composition for treating paper products with an emollient to reduce irritation and inflammation caused by blowing and wiping wherein the emollient includes cetearyl alcohol. The advantage of including cetearyl alcohol in the composition is to obtain a composition that softens, soothes, supples, coats, lubricates, moisturizes, or cleanses the skin. Therefore, it would have been obvious to one of

Art Unit: 1616

ordinary skill in the art to use the materials taught by Allen in the invention of Yang et al. to obtain a composition that softens, soothes, supples, coats, lubricates, moisturizes, or cleanse the skin in the absence of a factual showing to the contrary or a showing of unexpected results.

Double Patenting

5. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

6. Claims 24 and 25 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2 and 20 of prior U.S. Patent No. 6,146,648. This is a double patenting rejection.
